

MAD (Money Analysis & Decisions) — FULL FEATURE ROADMAP

This roadmap defines **what to build, in what order, and why**, so development stays structured and aligned with the product vision.

PHASE 1: FOUNDATION (DATA + CONTROL)

Goal:

User ka data reliably capture aur control ho

1. Smart Expense Entry (START HERE)

- Natural input (e.g. "250 swiggy")
- Auto parsing (amount + note)
- Category detection (basic)
- Auto timestamp
- Save to DB

 Output: User easily expense add kar sake

2. Transaction History (Basic)

- Recent transactions list
- Sorted by latest
- Timestamp display
- "View All" screen (full list)

 Output: User ko apna data clearly dikhe

3. Edit Transaction

- Amount edit
- Note edit
- Category edit

 Output: User apni galti fix kar sake

4. Mark as Incorrect (NO DELETE)

- Toggle flag: isIncorrect = true
- UI indicator (greyed / tagged)

👉 Output: Data safe + controllable

✅ Phase 1 Complete When:

- Add ✓
 - View ✓
 - Edit ✓
 - Mark incorrect ✓
-

🟦 PHASE 2: UNDERSTANDING (ANALYTICS)

🎯 Goal:

User ko samajh aaye paisa kaha ja raha hai

5. Category Improvement Engine

- Better keyword mapping
- Add new categories:
 - Smoking
 - Alcohol
 - Grocery
 - Reduce "Others"

👉 Output: App intelligent feel kare

6. Insights Screen ★

- Pie chart (category-wise spend)
- Line chart (daily/weekly trend)
- Category breakdown list

👉 Output: Visual understanding

7. Money Health Score ★

- Score calculation logic
- Based on:

- Expense vs income
- Category distribution
- Score levels:
- Good / Medium / Bad

👉 Output: Quick financial health indicator

✅ Phase 2 Complete When:

- User samajh paaye:
 - "kaha kharch ho raha hai"
 - "kitna control me hai"
-

🟣 PHASE 3: GUIDANCE (CORE USP)

🎯 Goal:

User ko batana kya karna chahiye

8. MAD Guidance Engine ★

- Smart suggestions:
- "Food spend high hai"
- "Subscriptions reduce kar"
- "Savings badha"

👉 Output: Actionable advice

9. Goals System

- Set goal (e.g. save ₹50,000)
- Track progress
- Suggest adjustments

👉 Output: Direction + motivation

✅ Phase 3 Complete When:

- App sirf batata nahi, guide karta hai
-

PHASE 4: AUTOMATION

Goal:

Manual effort kam karna

10. Bill Reminder System

- Monthly bills (rent, subscriptions)
 - Due alerts
-

11. Repeat Detection

- Same expense pattern detect
- Suggest: "Auto add karna hai?"

👉 Output: Less manual input

PHASE 5: SOCIAL

Goal:

Group money handle karna

12. Split Expenses ★

- Add friends
 - Split amount
 - Track shares
-

13. Settlement System

- Pending payments
- Notify others
- UPI / payment deep link (later)

👉 Output: Social usage

PHASE 6: ADVANCED INTELLIGENCE

Goal:

High-level financial decision system

14. Financial Suggestions (Advanced)

- SIP recommendations
 - EMI planning
 - Budget allocation
-

15. Dynamic UI (Emotion-based) ★

- Score based UI changes
- Tone changes:
 - Calm / warning / aggressive

👉 Output: Emotional engagement

FINAL USER FLOW

1. Add expense
 2. See history
 3. Understand spending
 4. Get score
 5. Receive guidance
 6. Improve behavior
 7. Automate
 8. Use socially
 9. Optimize financially
-

CORE PRODUCT TRANSFORMATION

Tracking → Understanding → Guidance → Decision System

FINAL NOTE

If Phase 1 + Phase 2 + Phase 3 are done well:

👉 Product already becomes powerful

Everything after that = enhancement
